55. Small Wind Energy Systems

It is the purpose and intent to promote the safe, effective and efficient use of small wind energy systems (SWES) to reduce the on-site consumption of utility-supplied electricity while protecting public health and safety without significantly increasing the cost or decreasing the efficiency of a SWES. An SWES may be appropriately located on larger residential parcels, commercial/ industrial sites or for public facilities and shall be considered an accessory structure and use in the land use districts where it is listed in accordance with the following requirements:

- (1) Maximum Tower Height:
- (a) Parcel size – 0.2 ha. (0.5 acres) – 0.4 ha. (1.0 acre)

No maximum

Tower height shall be in accordance with the manufacturer requirements and shall conform to the setback requirements below.

No requirements

The Development Authority may waive the tower base setback requirements if the affected adjacent property owner grants an easement registered on title for the location of the SWES to be closer than these requirements.

(4) Visual Impact

The nature of a SWES requires the installation of the turbine on a tall tower, 30 ft.+ above structures or trees to reach wind conditions and avoid turbulence. Visual Impact concerns shall be considered where there is significant scenic or historical value associated and where there is a clear public benefit.

(5) Consultation Requirements

Applicants for a SWES shall be responsible for circulating the proposal prior to application to adjacent property owners using the approved form. Any comments received from the circulation shall be included with the application.

 - (b) Guy wire anchors shall be setback at least 28.0 m (91.9 ft) from the property line.
 - (c) Communication towers must have the least practical adverse visual effect on the environment. This may be mitigated through design features, landscaping and/or fencing.

- (8) Where Transport Canada requires that a telecommunication tower be lighted, the following procedures shall be encouraged to minimize visual impacts:
- (a) the lighting of equipment structures and any other facilities on site shall be shielded from adjacent properties where possible without interfering with the requirements of Transport Canada;
 - (b) all lighting shall be a minimum number of low intensity white lights; and
