

## REGIONAL RECYCLING PROGRAM 2010

The Drumheller & District Solid Waste Management Association in cooperation with your local Municipality are pleased to announce their new Regional Recycling Program. The Association will initially collect cardboard and newsprint at all of the transfer stations within the region. After the program is established and the public becomes accustomed to the recycling program, the Association may consider expanding the acceptable items to include other household recyclables.

Effective May 2010 there will be roll off recycling containers placed at all of the Transfer Stations. One for Newsprint and one for Cardboard, Please ensure you place only cardboard in the cardboard bin and only newsprint in the newsprint bin.

While most waste products are recyclable, the markets and economics dictate what products are viable to collect and process. In order to encourage "separation at source" recycling, please collect and sort your recyclable materials as follows:

### CARDBOARD

- ❖ clean & dry, corrugated boxes. No waxed boxes.
- ❖ please remove plastic liners, wood inserts, packing etc.
- ❖ all box board, ie: cereal, soap or dry food boxes. Please remove all plastic liners
- ❖ brown paper bags & brown paper envelopes.
- ❖ **PLEASE cut cardboard and place flat through the slots into the collection container.**
- ❖ **Cardboard soiled with paint, oil or other non soluble chemical is NOT recyclable.**

### NEWSPRINT

- ❖ clean & dry newspapers, T.V. times, Auto Traders etc.
- ❖ any flyers that come with the newspaper may go with the newspaper.
- ❖ glossy magazines with staples.
- ❖ **PLEASE DO NOT** place any food waste or household garbage inside the recycling containers, this will render the materials un-recyclable.
- ❖ **PLEASE** place only cardboard in the cardboard container and only newsprint in the newsprint container.
